

SALEEN SHAKERCHARGED

BECAUSE YOUR SUPERCHARGER SHOULD BE SEEN AND HEARD

The all new, Saleen Shakercharger™ Intake now optimizes the intake efficiency for more flow.

The high-flow, cast aluminum, inlet top has a larger cross sectional area, an improved bend radius, and a shorter air path for virtually no restriction. The injection molded lower air box features an enormous 115mm mass airflow sensor, capable of supporting huge HP numbers. The cast aluminum "Shaker" hood scoop looks awesome sticking out of your Mustang hood. If this isn't enough to convince you, test it and see for yourself.
