

# Indoor Cover Fabric Guide

Fabrics shown below are primarily designed for indoor storage protection. Some can be used on a limited basis outdoors at car shows, etc., but they do not offer the level of protection found in outdoor fabrics. Any of the outdoor fabrics can be used indoors.

Wash -	Home	Home	Commercial	Home
Dry -	Low	Low	Air	Low

**Smaller covers can be washed at home but commercial washers provide the best cleaning & rinse**

Limited Warranty *	90 days	90 days	4 years	4 Years
--------------------	---------	---------	---------	---------

\* Warranty is for defects in material and workmanship & against the fabric becoming unserviceable.

We will repair or replace after factory inspection.

## Definitions of "Performance" list -

**RAIN** - How well does the fabric resist rain? Best fabrics will shed water, but in extended rain storms even the best fabrics will absorb varying amounts of moisture.

**SNOW** - How well does the fabric resist snow? Snow on the surface of a cover will eventually melt. On the best covers minimal amounts of moisture will seep through the cover.

**ACID RAIN** - Will the cover hold out the contaminants suspended in acid rain?

**DIRT / DUST** - Will the cover prevent dirt and dust, which settles on a cover, to sift through over time?

**UV (sun) DAMAGE** - How good is the fabric at blocking UV rays from the vehicles surface and interior? Best fabrics provide 100% UV protection.

**BIRD DROPPINGS** - Best fabrics will not allow bird droppings to permeate the material and get on the exterior of the vehicle.

**TREE SAP** - Tree sap is difficult to remove from exterior surfaces. The best fabrics will prevent most types of tree sap from reaching the paint finish.

**BREATHABILITY** - How easily can moisture, condensation and heat escape from under the cover?

**HEAT INSULATION** - Is the fabric thick enough to offer any insulating properties to reduce the vehicle temperature on hot days?

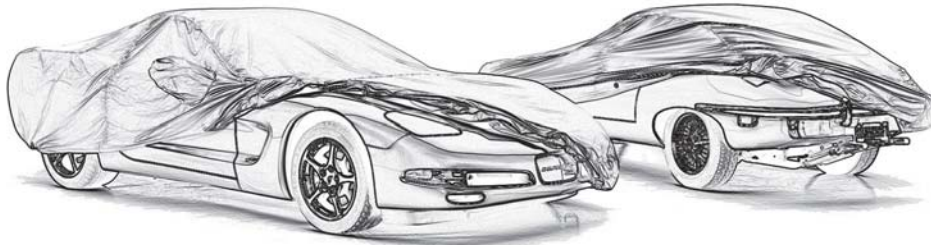

**SOFT TOUCH** - How soft to the touch is the fabric? Best fabrics provide a soft, silky finish against the paint surface.

**DING PROTECTION** - Based on the thickness of the fabric, will it provide some ding protection for the vehicle while parked?

**EASE OF HANDLING IN THE WIND** - How easy is the cover to install and remove in windy conditions? Generally, fabrics with higher weight per square yard are easier to handle.

**STORAGE SPACE REQUIRE** - How much trunk space is required for a stored, folded cover?

**MILDEW/ROT RESISTANT** - All Covercraft fabrics are treated with inhibitors to minimize mold and mildew.

Our goal is to offer the widest range of fabrics to meet the needs and target cost of our customers. **Use the chart below to help select which custom pattern fabric is best suited for the protection needs of the vehicle.** Consider where the cover will be used and how often. Remember that by using a cover you are protecting BOTH the exterior and interior of a vehicle.

## How to Order Custom & Ready-Fit® Covers

Locate the vehicle listing on the following pages. This application guide shows just a portion of the more than 50,000 patterns in our digitized cutting computer library. You have a choice of Custom Fit or Ready-Fit® patterns. The primary difference between the two styles is:

**Custom Fit** - Follows the exact contours of the vehicle body. The patterns are designed so the cover protects the sheet metal of the vehicle and normally extends half way down the tire. Custom Fit covers are more tailored and will not move around in the wind as much as a universal type cover. Due to body shape, not all covers require mirror pockets. The application guide notes the number of mirror pockets in each pattern.

**Ready-Fit®** - These covers are actually "semi-custom", since they come in staggered size lengths to make sure you don't get a cover that is too big for the vehicle. For cars, we use a "hatchback" shape to accommodate as many different styles of vehicles as possible. They do not have mirror pockets but the pattern makes allowance, with space for most styles of mirrors.

Noted below is an example of the information shown in the application guide:

MAKE, MODEL & YEAR	PATTERN No.	SIZE GROUP	MIRROR POCKETS	BODY STYLE	BUDGET	STANDARD	DELUXE	TECHNALON®
					BLOCK-It 100 U3 SERIES	BLOCK-It 200 U4 SERIES	BLOCK-It 380 U7 SERIES	EVOLUTION® U8 SERIES
Integra Sedan, 1994-01	C14404	G3	**	a	C35004	C40004	C78004	C80004

This is the **Custom Fit** pattern number

The **size group** determines the price of the cover (you need to select a fabric in the size for your vehicle).

Two **asterisks** mean there are mirror pockets on both the left and right side of the vehicle, one asterisk means there is a mirror pocket on the drivers side only.

Refer to the "**Body Styles**" chart at the bottom of this page to verify the shape of your vehicle.

These are **Ready-Fit** patterns available for this specific vehicle. They will provide a good semi-custom fit.

Covercraft is the world's largest manufacturer of custom vehicle covers. If your vehicle is not listed, please inquire. We can custom-make a cover to your dimensions. ***If it has wheels, Covercraft can cover it!***

To inquire about a vehicle that is not listed, please provide the following information with your order:

- 1-Make of Vehicle (Ford, Toyota, BMW)    2-Model Year (1995, 1928, etc.)    3-Vehicle Model (Camaro, Xtra Cab Pickup, etc.)
- 4-Body Style (refer to chart below)    5-Fabric Type Desired    6-Optional cable lock or bag required?

**Be sure to advise us of any optional equipment or accessories added to the exterior of the vehicle - light bars, wings, body kits, spoilers, etc.**

Covercraft's goal is to offer the widest range of fabrics to meet the needs and budgets of our customers. **Use the charts on the previous two pages to help select which custom pattern fabric is best suited for the protection needs of the vehicle.** If you have any additional questions, call us at 800-4-COVERS, or email sales@ covercraft.com
