

DESCRIPTION AND OPERATION

Daytime Running Lamps (DRL)

If the smart junction box (SJB) is configured for daytime running lamps (DRL), this feature illuminates the low beam headlamps at a reduced intensity when the following conditions exist:

- The ignition switch is in the RUN position.
- The headlamp switch is in the OFF position.
- The parking brake is not engaged.

For additional information on the low beam headlamps, refer to Section 417-01.
