

**2009MY ESCAPE & ESCAPE HYBRID
FAST TURN ORDERS**

In an effort to provide dealers with guidance on ordering recommendations, Ford has developed specific ordering recommendations, which statistically represent the fastest turning configurations when this specific content is grouped together (referred to as Fast Turn Orders). The Fast Turn Orders were developed as a result of an extensive analysis of actual retail dealer sales performance of every vehicle configuration with the goal of identifying those configurations with the best DOL performance.

FTOs are designed to provide dealers with:

- Completely configured vehicle orders representing the fastest turning configurations available
- Options to consider adding to FTOs that do not degrade the inventory turn performance

There are 8 FTOs for the 2009MY Escape, and the FTOs for Escape have been set up similar to a fast food restaurant's "Combo Meal Menu", as there are a number of pre-ordered vehicles that dealers can select directly from:

2009 ESCAPE & ESCAPE HYBRID MAJOR PRODUCT CHANGES

OVERVIEW

Introducing the new powertrain line-up for 2009 Escape & Escape Hybrid (HEV). These new powertrains deliver both improved performance and improved fuel economy. The all-new 2.5L I-4 (gas) produces 170 horsepower and increased torque, while achieving improved fuel economy in both city and highway driving. The 3.0L V-6 delivers a 20% improvement in horsepower at 240HP while still achieving improved fuel economy in both city and highway driving. These gasoline engines will be offered with an all-new 6-speed automatic transmission. The Escape Hybrid gets a new 2.5L I-4 Atkinson Cycle engine. AdvanceTrac® RSC is standard on Hybrid for 2009 and a new Hybrid Limited series is available.
