

## **Fascia Tow Hook Trim Templates**

- Attached are templates to trim replacement front and rear fascias on a FR500S for tow hooks.
- After printing, check the scale before using.
- The dots on the template line up with the dimples on the fascia for the license plate screws.
- Note that the rear fascia and tow hook are unique to the FR500S and NOT common with the FR500C, due to the Cobra/Cal Special rear fascia.
